Projects

Togetha - A Dating App | React.js, Node.js, Express.js, MongoDB, Redux, Socket.IO, TailwindCSS

- Developed a responsive, swipe-based matchmaking platform inspired by Tinder using react-tinder-card, with personalized user profiles, requests, and connection system.
- Built secure user authentication and session management using JWT and cookies; integrated RESTful APIs via Express.js and managed global state through Redux.
- Implemented real-time one-to-one chat using Socket.IO, enabling instant messaging between matched users with live UI updates and smooth user experience.

StreamVibe | React.js, TMDB API, Tailwind CSS, Firebase, Gemini AI

- Developed a movie streaming interface with React.js and Tailwind CSS, ensuring a smooth and responsive user experience across all devices.
- Integrated TMDB API to fetch trending movies, apply genre filters, and display dynamic content.
- Used Firebase Authentication to manage secure user sign-up and login functionality.
- Implemented Gemini API to enhance movie search with smarter, AI-powered results.
- Built reusable components for movie cards, modals, and search bar to promote scalability and clean architecture.

Dash 3 | React.js, Tailwind CSS, ShadCN/UI, Chart.js, Coingecko API

- Built a dynamic crypto dashboard displaying live market prices, trends, and updates using Coingecko API.
- Integrated Chart.js for visualizing historical price data with interactive charts.
- Implemented search, pagination, and shimmer loading states for a seamless and responsive user experience.
- Styled using Tailwind CSS and ShadCN/UI for a modern, clean interface across devices.
